LEAD THE WAY

**STRAMMER** ([www.strammer.com](http://www.strammer.com)) is an International Executive Search and Strategic Advice Consultancy specialized in Lifesciences.

With offices across Europe, we provide our customers with tailor-made Full Talent Solutions (Recruitment and Talent Management) all over the world.

Today we are hiring for an international network of medical laboratories. As a partner of many doctors and patients our Client is answering the needs in terms of complex medical testing. The laboratory performs tests on medical samples in the most varied fields: biochemistry, coagulation, haematology, hormonology, immunology, serology, microbiology, mycology, molecular biology, toxicology, etc.

In order to strengthen the team, our Client is looking for

## **Clinical Biologist – Medical Doctor / Pharmacist (M/F)**

### **Your role**

As a full-time clinical biologist, you are part of a team of biologists. You are responsible for the organization and proper functioning of your department and you are responsible for internal and external scientific support.

- You validate and authorize the laboratory results of the various fields in clinical biology
- You formulate opinions concerning corrective and preventive actions in collaboration with our quality division
- You are responsible for validating and implementing new tests in your department

### **Your profile**

- **You are a clinical biologist doctor or clinical biologist pharmacist (M / F) OR a student proactively looking for job opportunities**
- You are a great team player with an understating of team spirit value
- You attach great importance to the daily service rendered to doctors and patients
- You are fluent in French and have a good command of English and Dutch (considered as a plus)

**Do not hesitate to get in contact with me in order to discuss this and other professional opportunities!**
